- Improved volume slider control.
- Re-skinned Favourites window.
- Added “Add to playlist” button in Favourites control bar.
- Added “Add to playlist” and “Add to favourites” buttons in History control bar.
- Minor UI tweaks.

1.16

Enhancements:

- Minor user interface improvements.
- Spanish language supported. Many thanks to Yolanda Balague.

1.15

Enhancements:

- Japanese language supported. Many thanks to Atsushi Nakatsugawa.

1.14

Enhancements:

- Open URL feature. The user can now open any supported video directly from the remote location.
- MPEG-4 now supported. The user can now play videos encoded with H.264 high definition codec.

1.13

Enhancements:

- Localization support added. Adding new language versions is now quick and easy.
- Two languages supported: Polish and English.

Notes:

- Database has been redesigned, so an update from version 1.12 or earlier will reset your playlists, history, favourites and settings

1.12

Enhancements:

- Auto-play setting.
- Favourite videos. The user can now organize a tree of his/her favourite videos.
- Playlists window. The user can now compose and playback a playlist, which contains videos originating from many sources, including YouTube, known remote locations and local hard drives.
- History window. The application now stores the history of playbacks.

1.11

Enhancements:

- Improved player buttons.

Bugs fixed:

- Fixed full screen mode video size bug.

1.10

Enhancements:

- Local video playback.
- Full screen playback mode..
- Standard You Tube video feeds.
- You Tube URL video fetch.
- Improved player controls.
- FLV drag and drop support. User can drag a local video and drop it in the application, to begin playback. In Favourites and Playlist windows, user can drag items to rearrange the order of videos.
- Improved overall performance and speed.
- SQLite powered video cache.
- Sound spectrum bars.
- Improved layout and design.
- Lists contain tool-tips with the video title.

Known bugs:

- On dual monitor machines invalid video size in full screen mode when secondary monitor has different screen parameters from the primary one.
